How to play

Wild Flower

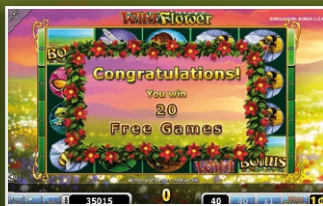

With the Wild Flower Selection Feature, you can influence the win frequency and your chance for big wins!

- Choose your number of paylines
- Choose your bet per line
- All wins are paid left to right, except bonus wins.
- Get the chance to win up to 600(!) free games during one session in the Free Games Bonus

BONUS FEATURES

FREE GAMES BONUS

If three, four, or five *Meadow Bonus* symbols appear anywhere on screen, 20, 40 or 100 free games will be triggered respectively. Before the free games start, you may choose your favourite flower to be wild. During the free games, all *Wild* symbol change to *Wild x2*. Free games can be re-triggered up to a maximum number of 600(!) during one session.

WILD

The *Wild Flower* (depends on player selection: purple, blue, red, yellow or white flower) symbol substitutes for all other symbols except for the *Meadow Bonus* symbol.

SPECIALS

Wild flower feature

Before the start of the actual game, you may choose the volatility of the base game by selecting one of five flower symbols. The selected flower is wild and it will influence the win frequency and chance for big wins. The *purple flower* represents a high win frequency but lower chances for big wins whereas the *white flower* should be chosen for a lower win frequency but high chances for big wins. The *blue, red or golden flowers* stand for a balanced approach.
